FOUR HANGED AND FIVE FLOGGED

Several Women Witness An Execution in Egypt.

PUNISHMENT LONG DRAWN OUT.

An Example Made of Natives Who Attacked a Party of British Officers Near Tantah —One Man Left Hanging While Two Others Are Whipped.—Then Another Is Hanged and Two More Whipped.

Cairo, (By Cable).—As a result of the sentences imposed by the court which recently tried the natives concerned in the attack, June 13, on a party of British officers who were pigeon shooting at the village of Demshawi, near Tantah, four natives were hanged at Demshawi and five were flogged. The prisoners, in carts left Shibinelkom guarded by infantry, the gallows and whipping post following. When the cavalcade arrived at Demshawi Captain Macbeth, adjutant to the Egyptian Minister of the Interior, selected a spot close to the road and roped in a space measuring 60 by 30 yards, in the center of which the gallows and whipping pen were erected.

At 1.30 P. M. one of the prisoners was hanged and the body was left hanging while two of the condemned natives were whipped. Then another man was hanged and two more were whipped, and then in turns two more men were hanged and the fifth man was whipped, each of these receiving 30 lashes while the cart.

A guard of soldiers surrounded the inclosure and hundreds of natives stood in a wide circle 200 yards distant. The women wailed dismally as the lash was applied and when the culprits were hanged. All the condemned men were calm, but the sons of the cut cheered groans and cries. The executions and whippings were finished at 4.30 P. M.

London, (By Cable).—Answering a question put by John Dillon, Irish Nationalist, in the House of Commons, Foreign Secretary Grey said that he had telegraphed to Cairo for information regarding the trial and sentences of the natives who took part in the attack on British officers at Demshawi.

The prisoners had a full and fair hearing and were defended by counsel of the highest-known native advocates. The court was unanimous in pronouncing the men guilty, the evidence establishing premeditation and concerted action. The chief attack took place after the officers had given up their guns. The character of the tribunal was a safeguard that justice had been done.

In conclusion, the Foreign Secretary said he was further informed that the British government had no legal power to interfere in the matter.

WOULD SHOW THEM UP.

Prince Insurance Companies That Repudiate Policies.

Washington, D. C. (Special).—Representative Kahn, of California, stated on the floor of the House that more than one-half of the insurance companies doing business in San Francisco had signed a compact and had announced that under no circumstances would they pay more than 75 per cent. of their losses. Some companies, he said, had repudiated their policies entirely, and Lord Douglas, he would pay their losses dollar for dollar.

Mr. Kahn said the people of the country out in favor of the name of the companies that repudiate their policies and those who refuse to meet their obligations. "And I hope," he continued "that when Congress reconvenes next winter, to place in the Congressional Record the name of every insurance company that refuses to meet its just obligations in that city, that the people of the country may know the unreliable companies."

No Smokers Wanted.

Norfolk, Va. (Special).—The Navy Department wants no more apprentice boys at the Norfolk Navy Yard who smoke cigarettes. Of 10 applicants for the vacancy four were found to be addicted to the habit of smoking cigarettes. They were rejected forthwith by the examining surgeon. The applicants addicted to the use of cigarettes have been found unreliable in the past and no more smokers will be accepted. It is probable that the same rule will be applied in other navy yards.

Revolution is Over.

Washington, D. C. (Special).—Minister Combs cables the State Department from Guatemala City as follows regarding the revolutionist disturbances in Guatemala: "Information has been received here to the effect that peace reigns entirely in the west and south of the republic and the trouble is considered to be over." The troops referred to by the Minister are understood to be Guatemalans who gathered in Salvador and crossed into their own country in the attempt to overthrow President Cabrera's government.

Wendell Phillips Garrison Retires.

New York, (Special).—Wendell Phillips Garrison has resigned from the editorship of the Nation after 21 years' service. Hammond Lamont, for six years managing editor of the Evening Post, succeeds him. With Mr. Lamont will be associated Past Ethner Morse, now literary editor of the Evening Post. Harold J. Lesynski, the present city editor, succeeds Mr. Lamont as managing editor of the Evening Post.

Unclean Meat Houses.

Chicago, (Special).—Unsanitary conditions have been found to exist in some of the Chicago independent meat-packing establishments, according to a report of Chief Inspector Dr. Charles E. Hastings to Health Commissioner C. J. Whalen, following an inspection of the smaller plants at the Union Stock Yards. Others were found to be clean, well ventilated and in a general satisfactory condition. The plants adversely criticised in the report in most instances have begun to show signs of improvement.

Heat Leads to Suicide.

London (By Cable)—The hot weather is producing the usual results in the number of suicides. It is found that the men who do away with themselves generally resort to hanging to effect their purpose, while the women drown themselves. A specialist explains that the tendency to commit self-murder is due to relaxation of the blood vessels and reduction of the blood pressure, which heat naturally causes. The cerebral centers are thereby degressed, affecting the will power.
